CHAPTER A (19)
LIST OF PRODUCTS CARRIED IN BULK
CHAPTER CONTENTS

A1. List of products carried in bulk

A1. 19 LIST OF PRODUCTS CARRIED IN BULK

100. List of products carried in bulk

101. 19.1 The first column of the Index of Products Carried in Bulk (hereafter referred to as "the Index") provides the so-called Index Name. Where the Index Name is in capitals and in bold, the Index Name is identical to the Product Name in either ANNEX III (chapter III) or ANNEX IV (chapter IV). The second column listing the relevant Product Name is therefore empty. Where the Index Name is non-bold lower case it reflects a synonym for which the Product Name in either ANNEX III (chapter III) or ANNEX IV (chapter IV) is given in the second column. The relevant ANNEX of the RBNA Rules is reflected in the third column.

102. 19.2 Following a review of ANNEX V (chapter 19), a column listing UN numbers which was previously included has been removed from the Index. Since UN numbers are only available for a limited number of Index Names and there are inconsistencies between some of the names used in ANNEX V (chapter 19) and those linked to UN numbers, it was decided to remove UN number references in order to avoid any confusion.

103. 19.3 The Index has been developed for information purposes only. None of the Index Names indicated in non-bold lower case in the first column shall be used as the Product Name on the shipping document.

104. 19.4 Prefixes forming an integral part of the name are shown in ordinary (roman) type and are taken into account in determining the alphabetical order of entries. These include such prefixes as:

Mono Di Tri Tetra Penta Iso Bis Neo Ortho
Cyclo

105. 19.5 Prefixes that are disregarded for purposes of alphabetical order are in italics and include the following:

n- (normal-)
sec- (secondary-)
tert- (tertiary-)

o- (ortho-)
m- (meta-)
p- (para-)
N-
O-
S-
sym- (symmetrical)
uns- (unsymmetrical)
dl-
D-
L-
cis-
trans-
(E)-
(Z)-
alpha- (a-)
beta- (b-)
gamma- (g-)
epsilon (e-)
omega (w-)

106. 19.6 The Index utilizes a note after the index name for some entries (shown as (a) or (b)) which indicates that the following qualifications apply:

(a) this Index Name represents a subset of the corresponding Product Name.

(b) The Product Name corresponding to this Index Name contains a carbon chain length qualification. Since the Index Name should always represent a subset or be an exact synonym of the corresponding Product Name, the carbon chain length characteristics should be checked for any product identified by this Index Name.

TABLE T.A1.100.1 – LIST OF PRODUCTS CARRIED IN BULK - MEPC 64/WP.12

| Index Name | Product Name | ANNEX |
